**PRENATAL BONDING (Bindungs-Analyse by Raffai)** provides the possibility of creating an intense bonding between mother and Unborn, of being witness to the development of the fetus in the womb, to realize early prenatal traumas as well to have the chance for immediate healing. In this respect the method is at the same time an instrument of pre- and perinatal research, an empowerment of bonding between mother and fetus and a great help for giving birth much more easily. After birth the baby has a remarkable degree of self-esteem and full access to its personal potential.
